1. What did you learn?

I learned about how heapng can provide additional functions to perform on the previously learned ADT trees. I also pushed myself to make an interface which will serve as a blueprint for implementing more complex heap structures in future projects, potentially outside of CMSC 204.

2. What challenges did you encounter, if any?

The lab assignment was fairly straightforward, albeit tedious and repetitive and loading the online tutorial caused my computer to lag significantly (but this is not an issue with the class).

Screenshots of Test Run:

How big do you want the array to be?

6

Enter array element #1

87

Enter array element #2

93

Enter array element #3

654

Enter array element #4

2534

Enter array element #5

183

Enter array element #6

58

Sorted array:

58 87 93 183 654 2534
